

3/4 Ton Capacity Underhoist Stand

Model: 43342

Designed to support vehicle components during repair, installation and removal processes. Ideal for holding exhaust systems and drivetrain components in position. The contoured saddle supports most component configurations.

- [SOLID BASE]: 12" circular base allows for easy positioning while providing a stable foundation for the stand. The threaded base provides a more solid non rocking support compared to similar bolt together designs.
- [SLENDER DESIGN]: Provides lightweight and easy handling in close quarters. Fits into compact spaces to be easily packed away.

STAGE 1

STAGE 2

EASY ADJUSTMENTS

Bearing Mounted Spin T Handle: Allows for smooth and easy turning when adjusting the height under the load.

SELF LOCKING

Threaded screw rod provides a self-locking function to prevent the stand from lowering without assistance.

POST

- **Dual stage work height.**
- **Stage 1: Support Range: 37-1/8" to 61-7/8"**
 - One tube for shorter height lifts or when a short support is needed.
- **Stage 2: Support Range: 54-1/2" to 79-1/4"**
 - Both tubes for extra height. For standard height lifts.

Our 2-piece post easily unscrews making it smaller for storage when not in use.
